

Thank you for downloading *Garage Organizer*

Garage Organizer is a point of sales for those who operate in the auto repair business. You will be amazed how it is easy to manage your inventory, your invoicing, your customers, etc. This program has been developed with a garage that operates in this field. This software can be plugged with a cash-drawer and an inkjet printer.

Garage Organizer is a tool developed for people who are in the business of tuning and repairing vehicles. This POS works with open invoices. The user closes the invoice when a final payment is done. Databases can be secured to avoid unauthorized intrusion. This POS is more than a regular POS. It performs various tasks. Here is a brief summary:

- Inventory control
- Cash Reconciliation
- Accounts receivable
- Produce order forms
- Supplier management
- Customer management
- Fac simile transmissions
- Manage many vehicles by customer
- Feature a specialized invoicing layout
- Produce forms for products to be returned
- Staff management (personal and occupational level)
- Use pre-printed stationery to invoice your customers

You can count on *Garage Organizer* to be reliable and accurate. The version that you just downloaded into your computer is completely functional. However, a watermark will appear on the invoice and some reports cannot be printed. In the "Invoicing" database, the tax is calculated as if you were an American citizen. Modifications can be made to meet standards for the citizens of other countries. *Garage Organizer* exists also in French and for Canadian citizens.

If you would like to have more information, contact us at: **contact@gestabiz.com**
Visit also our web site: **<http://www.gestabiz.com>**

To get started: Macintosh users, double-click on "Garage Organizer Solution" icon. Windows users, double-click on "Menu solution.exe" icon. Windows XP users, double-click on "Menu Solution".

In order to use the "Email" database for Windows users, Outlook cannot be the default client. Use Outlook Express or Netscape. **Never move the databases out of the folder.** These files are linked. Their functioning would be jeopardized.

Your satisfaction is my number one priority.
